

GENERATIONGREEN

sustainability takes root

The Environmental Education Association of Washington presents the 18th Annual EEAW Conference. Please join us in this action-oriented conference where today's generations build a healthy world for themselves and seven generations to come.

NOVEMBER 12 - 15, 2008

wenatchee convention center
wenatchee, washington

www.eeaw.org

call for presentations

Please join us in Wenatchee as we help empower and inspire today's generations to make decisions now that will ensure healthy ecologies, healthy economies, and healthy people for themselves and seven generations to come.

See www.eeaw.org for details and abstract submission instructions.

encouraged to present and attend:

Stakeholders and leaders in environmental and sustainability education including youth, teachers and school administrators, college and university educators and administrators, early childhood education practitioners, researchers, business and governmental leaders, educators and managers in civic, community-based and non-formal organizations, and others!

presentation topic suggestions:

Farming and

consuming green: What are the current trends in agriculture, distribution and consumption? What role can and does education play?

Naturally green:

As forests and shrub steppe, water ways and wildlife come under increasing threat, what education programs are helping students understand, enjoy and steward our precious natural resources?

Learning and teaching

green: What model programs and research are helping sustainability take root in our centers, schools and colleges/universities?

Powering and

transporting green: What are some of the most exciting advancements in energy and transportation, and what model programs are preparing the green and white collar workforce of tomorrow?

Building green: What's happening in the design, construction/renovation and maintenance of green buildings? What are model education programs and strategies to scale this up?

Living green: What lifestyle changes will make a huge impact if we're all involved, and who's doing the outreach and education to help us make the shift?

abstract submission deadline is **July 25**
